**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 4, line 10: after "signal is from", insert --the--.

**REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: the prior art fails to teach the method wherein a predetermined conversion factor related to the optical density of the optical filter is used to convert reduced-intensity integrated scattered light signals into a scaled signal. Strickland et al. (US 5,576,827) teach determining a correction factor of light scattering outside a dynamic range based on results from different measured exposure times, but do not teach the conversion factor being predetermined. Phillips et al. (US 6,171,793) teach a method for providing an extended dynamic range by detecting signals at a first intensity and then collecting a second set of signals using a filter, but teach converting the reduced-intensity integrated scattered light to a scaled signal using a conversion factor that is calculated from the first and second set of data and changes with each sample. Therefore, the conversion factor of Phillips et al. is not a predetermined conversion factor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
